Saturn

There was days of sadness, where Saturn would trudge through the snow two miles for bread and milk and then return with his feet frozen to a house littered with honeybees.

In the bathtub, while his toes thawed and Cameron sat in the next room reading those impossible books about capturing birds with pepper shakers and salt, Saturn dialed. Calling her, and she whose name is no longer cited in the dedication page, would pick up and instantly hang the receiver. On her answer machine Saturn would say, "It is me, Sal. me. Te extraño mucho," so that she would understand and she next door could not over hear.

It went on for pages and pages and when Saturn opened the bill he complained to the telephone company telling them that he had only called her once.

Cardinal Mahony

The overarching lesson, that took a decade of seminary, was that our hands could be pure and that we who are mortals can be closer to the sky *(one day)* through prayer and meditation.

But there was easier and much quicker ways. *Where you can touch the sky and feel its weight and texture.* It's sharp edges and have hands so pure that they are always confused for those of church saints.

So when the theology students came asking for holiness I told them about airplanes and white wash; and then about the greatest holiness found in the touch of a girls tangled hair.

It was a day in the Canadian winter, Saturn had his papers spread out on the hotel bed. I brought in snow from the sidewalk, carried it up the elevator and crumbled the snowball over his head. A snow flurry he said and it was one of those rare moments where we laughed and wrestled.

We laid our sheets stiff with industrial starch touching each others faces, he put his finger between my lips.

"Cami, I have not felt this way for pages and pages," he said and then kissed me. But that was before the sharks, before the bee collectors returned, when he was calling me by the name that is my name.

We must regrettably inform you that we are withdrawing support from the war.

Several items have been brought to our attention.

Falsified wedding certificates and honeycombs are not behaviors the Soros foundation wishes to promote. *They are in a name of this because we wish to change.*

At first it was only the potted flowers. Their petals burned by their proximity to Saturn.

Saturn was not falling as Froggy had announced; its mass was increasing, expanding, and its heat and glow of its rings accelerated the growth of the flowers. From seed to bloom in less than a week. But as the flowers budded they opened revealing not soft and tight, but loose and burned petals that fell from the stem and disintegrated into an ash that caught in the wind.
